

4006ci / 5006ci / 6006ci

Never before has it been so easy to make a perfect first impression.

Our A3 colour multifunctional systems offer reliable and excellent quality in a minimum of space: A print resolution of 1,200 x 1,200 dpi, newly developed toner and advanced colour technology provide a perfect result. In addition, the intuitive, large colour touch display is now extremely easy to operate. The HyPAS interface makes it easy to integrate additional customised software solutions*.

The systems also score highly when it comes to the environment: If required, blank pages can be automatically filtered out when scanning and copying thanks to the Skip Blank Pages function. This can result in great savings, particularly for the 270-sheet dual scan original feeder*, which features fast scanning and gentle handling of original documents. Another advantage is that you can create text-searchable PDF files* and therefore make it easier to find information in a document.

What you can expect:

Professional printing: The option to process various paper thicknesses in one go enables you to also create professional handouts and presentations. In addition, the versatile printer driver offers intuitive tools for the further optimisation of colour reproduction.

Flexible paper management: Up to 7,150 sheets* of different paper types and paper weights can be fed. The printed pages are then processed via an internal* or external finisher*, also with an optional punch unit. The brochure finisher* can also output tri-folding for letters or flyers in addition to A5 and A4 brochures. Furthermore, the multi tray* for the brochure finisher* ensures that the documents of a work group do not get mixed up. Our standard paper cassettes are also naturally equipped with our new soft close feature.

Simplest operation: The large 9-inch colour touch display with a picture diagonal of 22.86 cm makes it easier to execute the wide range of functions on offer. The home menu, which you can adapt to suit your requirements, is particularly helpful here. In addition, the optional Fiery® Controller offers top productive performance when it comes to processing and reproducing challenging colour print data.

Maximum security: The 'Private Printing' function allows a PIN code to be assigned to print jobs and ensures that print jobs can only be activated by authorised users. The Data Security Kit* encrypts your hard disk data and deletes it securely after use.
